Education

University of Warwick – Electronic engineering, 2021 – present.

Modules studied include: Engineering design, electronic circuit design and analysis, engineering business management.

A Levels – Oaklands Catholic Sixth Form, 2019 – 2021:

4 A* in Mathematics, Further Mathematics, Physics and Chemistry

GCSEs – Oaklands Catholic Secondary School, 2014 – 2019:

4 * Grade 9, 6 * Grade 7, including Mathematics and Triple Science

Memberships/Certificates:

The Institution of Engineering and Technology

Relevant Experience

Technology Officer – Warwick Engineering Society, 2022 – present:

Being a member of the Warwick Engineering Society exec has provided me numerous opportunities to develop my teamwork, communication and technical skills. Some responsibilities include:

- Ambassador for the society and for the Warwick School of Engineering on open days, this involved organising demonstrations and speaking with prospective students about the university.
- Set up and manage the technology for any events and for the regular functions of the society. This requires close collaboration with the other members of the exec team to ensure a positive experience for society members. For example, ensuring all the details on the society website are correct and setting up the automatic ticketing systems for live events.

Other Experience

Contributed to multiple volunteering projects while at University. This includes working at a night shelter in where I was tasked with talking to and taking meal requests from the guests. Through good communication and planning ahead with colleagues in the kitchen, over 40 hot meals were provided over the course of a couple hours.

Participated in several group projects during the first year of university, including a hovercraft design competition and audio filter design. In every instance, strong leadership skills were required to ensure the team remained organised and working together effectively under such tight deadlines.
